

CALIFORNIA DEPARTMENT OF  
FOOD & AGRICULTURE

A. G. Kawamura, Secretary

May 7, 2009

Mr. Richard Camp  
Kronos Micronutrients, LP  
P.O. Box 1167  
Moxee, WA 98936

Dear Mr. Camp,

This letter is in response to an email on September 14, 2007 regarding zinc application rates on the Wolfrack website. This letter also addresses concerns discussed in a recent meeting on March 16, 2009, and a letter received on March 25, 2009, regarding efficiency claims made on the Wolfrax Inc website.

We have worked with personnel at Wolfrack to address your concern regarding their zinc products and efficiency claims. Consequently, Wolfrax Inc has removed the information regarding efficiency values from their website.

Efficacy studies were provided by Wolfrax to substantiate their zinc products. A review of this information substantiates the products are fertilizing materials that provide the zinc micronutrient to plants.

If you have any further questions, please contact me at the number below.

Sincerely,

Amadou Ba, PhD  
Research Manager  
Fertilizing Materials Inspection Program  
Feed, Fertilizer, Livestock Drugs and Egg Regulatory Services  
Inspection Services
